PROJECTS

AI-Based Upskilling Learning Management System 01/2026 – 04/2026

NextGenPro Innovations | Team Project|5 MEMBERS
- Developed an AI-powered Learning Management System focused on personalized learning and career readiness.
- Implemented course management, assessments, performance tracking, and certification features.
- Designed psychometric tests and AI-based mock interview modules for skill evaluation.

- Collaborated in a team environment on system design, development, testing, and documentation.

MEMORA – Smart Reminder Application for ADHD & Early-Stage Dementia 07/2025 – 11/2025

Team Project | 5 Members

- Developed a smart reminder application to help individuals with ADHD and early-stage dementia manage daily tasks.
- Implemented task scheduling, reminder notifications, and caregiver support.
- Designed accessible, user-friendly interfaces and contributed to planning, documentation, and requirements analysis.
- Collaborated with team members throughout the software development lifecycle.

EventFinder – Opportunity Discovery Web Application 2026

- Developed a web application to discover events and opportunities based on user preferences.
- Implemented city, category, and deadline filters to help users find relevant opportunities.
- Integrated a third-party API using Node.js and Express.js to fetch and display event data dynamically.
- Designed a responsive interface featuring event details, participation modes, prize information, and direct links.

Personal Portfolio Website

- Built a portfolio website showcasing projects, technical skills, education, and certifications.
- Created a modern dark-themed interface with interactive elements and smooth scroll animations.
- Implemented responsive layouts and navigation for different screen sizes.
- Added GitHub, LinkedIn, contact details, and a downloadable resume.

INTERPERSONAL SKILLS

- Problem Solving
- Time Management
- Analytical Thinking
- Teamwork
- Communication
- Quick Learning
